

10

Recommendations of good practices to implement e-learning material in nursing education

1

Consider the learner; their level of knowledge and competencies in accordance with the complexity of the content and learning methods.

2

Ensure adequate orientation and possibility of technical support.

3

Ensure that the material is evidence-based and up to date.

4

Strive for authentic e-learning material. Include case scenarios and videos.

5

Involve the learner actively; assure that the learner is behaviorally engaged in the learning process.

6

Enable student-teacher interaction. Enable learner-learner interaction.

7

Verify that the e-learning material is accessible and easy to use. Consider the possibility to use with mobile devices.

8

Ensure freedom from time restraints; allow flexibility of study time and self-paced learning.

9

Provide feedback from learning without delay.

10

Use as an additional and supplemental learning method.
